## Career Summary

I'm a Freelance Web Developer based in St Kilda, Melbourne. I specialize in creating responsive, custom and admin friendly WordPress websites. I have a good working knowledge of the four common web technologies (HTML, CSS, Javascript & PHP).

I have a passion for working with great Designers to implement a Client's vision in a way that is User focused and easy to maintain for Administrators. Here are some of my past clients:

### Disability Services Commissioner

**March, 2016 - June 2016**

- Hired as a Web consultant to lead the DSC choose a team to Design, Test and Develop their new website, which had stringent accessibility requirements.
- Had to bridge security gaps on their old website which was seriously compromised, and continually attacked due to using an outdated, boutique CMS.

**Tools / Applications / Packages used:** Boutique CMS, HTML5, CSS3, PHP, Javascript, Net Security

### Vanzella Design Agency

**December 2015 - April 2016**

- Developed Websites from PSD to live, building custom WordPress themes.
- Implemented responsiveness in existing Websites.
- Built one page landing websites from PSDs.

**Tools / Applications / Packages used:** WordPress, HTML5, CSS3, jQuery, PHP, Photoshop, Advanced Custom Fields

### GMG Digital Agency

**July 2015 - December 2015**

- As part of a larger team, I worked closely with Designers to craft and implement sites from wireframe to live.
- Was mentored by a Senior Developer.
- Dealt with meetings with Clients, and support after sites went live.

**Tools / Applications / Packages used:**

WordPress, HTML5, CSS3, jQuery, PHP, Advanced Custom Fields, Woocommerce
